Erin,

Some of the anticipated reporting limits are below and some are in the attached files. All soil results will be reported on a dry weight basis so the actual reporting limits may be a little higher than indicated because the limits shown in the tables are based on 100% solids.

Barry			

Herbicides (Soil & Water)

Analyte	CAS Number	Water CRQL (ug/L)	Soil/Waste CRQL
			(ug/kg)
2,4-D	94-75-7	1.0	33
2,4,5-T	93-76-5	1.0	33

Pesticides & PCBs in Building Material/Debris

NOTE: Reporting limits should be similar to soil but will be dependent on the nature of a given sample.

Building material/debris samples could have widely different reporting limits.

Pesticides & PCBs in Wipes

NOTE: These units are ug/wipe. Final results will be reported in ug/cm2 (taking into account the area wiped).

Barry, can you supply me with the reporting limits and method detection limits on these? I just need a list to include in my QAPP. Thanks!

Barry, I've got a list for Dico chemicals we want to test for. Please see the attached. The list will give you the specific chemicals we need to analyze for associated with pesticides, PCBs and volatiles. I believe the few herbicides that we need are listed under the pesticides. We are NOT doing semi-volatiles or metals. They were just already on this list, which I found in an old report. And we are going through START for the dioxin.

Please give me a call sometime this afternoon if you can so that I can make sure there aren't any questions on this. Thanks!
